About the Game

Cave Runner 2D is a retro-style mobile platformer that challenges players to survive through 15 handcrafted levels filled with traps, enemies, and tight jumps.

Inspired by classic 8-bit platformers, the game combines nostalgic pixel visuals with modern mobile controls to offer a fast-paced and accessible challenge.

With precise gameplay, old-school ambiance, and no unnecessary clutter, *Cave Runner 2D* is made for retro fans who love quick, focused runs — whether you're in line or on the go.

Key Features

-  **Authentic pixel art** crafted for mobile screens
-  **15 handcrafted levels** with increasing difficulty
-  **Reactive controls** for precise jumps and timing
-  **Enemy variety**: slimes, rats, bats, spiders, skeletons and more
-  **Coins to collect** for score and challenge
-  **Optimized for mobile**: works offline, no account required
-  **Free to play** with no forced paywall

About the Developer

Cave Runner 2D was created by **Thibaud Dervily**, a French indie developer and full-stack engineer. Passionate about retro games, he designs mobile titles that blend modern usability with nostalgic gameplay. This is a solo-developed project built entirely in Unity with hand-made pixel art assets.

"I built this game to recreate the feeling of playing platformers as a kid — short bursts of frustration and satisfaction, all packed into a pixel world."
